

Live Pricing Method for Rockwell

How our catalog dynamically reprices 25,000+ coins in real-time, locks customer quotes, and guarantees margins.

EXECUTIVE SUMMARY • THE BIG PICTURE

In precious metals, **nobody manually changes price tags on thousands of items when gold moves**. Instead, top market dealers like APMEX and JM Bullion connect a live market feed to stored commercial rules. Rockwell uses this exact model: whenever a customer views a coin, the system instantly computes its metal value at that current second and adds Rockwell's commercial premium. The result is **100% automated real-time pricing, zero manual overhead, and complete profit margin protection** across all 25,000+ catalog products.

THE UNIVERSAL CALCULATION-ON-READ FORMULA

Customer Cash Price = (Live Spot Ask × Pure Troy Ounces) + Rockwell Commercial Premium

Prices recalculate dynamically on request. We change one single live market number, and every coin across the entire store automatically updates to the penny.

1. The Three Components of Every Price

FOUNDATION

1. LIVE METAL ANCHOR

The institutional market spot price per troy ounce updated continuously.

Gold (XAU): **\$2,400.00/oz**
Silver (XAG): **\$30.00/oz**

2. PURE METAL WEIGHT

The exact fine precious metal content contained in the physical coin or bar.

1 oz Buffalo: **1.000 oz**
1/2 oz Eagle: **0.500 oz**

3. ROCKWELL PREMIUM

Our commercial markup covering minting, fulfillment, and company profit.

Standard Gold: **+5.5% over spot**
100 oz Silver: **+\$1.80/oz fixed**

2. Clear Product Pricing Examples in Action

REAL-WORLD MATH

PRODUCT CATEGORY	PHYSICAL ITEM	PURE WEIGHT	BASE METAL VALUE	ROCKWELL PREMIUM	FINAL CASH PRICE
1 oz Standard Gold	American Gold Buffalo	1.000 oz	\$2,400.00	+5.5% (\$132.00)	\$2,532.00
Fractional Gold	1/2 oz Gold Eagle	0.500 oz	\$1,200.00	+7.5% (\$90.00)	\$1,290.00
Bulk Silver Bar	100 oz Cast Silver Bar	100.00 oz	\$3,000.00	+\$1.80/oz (\$180.00)	\$3,180.00
Collectible Gold	St. Helena Angel PF70	1.000 oz	\$2,400.00	+\$322.00 (Rare Coin)	\$2,722.00
Vault Buyback	Customer Selling 1 oz Gold	1.000 oz	\$2,390.00 (Bid)	-2.5% Spread	\$2,330.25

Commercial Controls & Safety Guardrails

How Rockwell protects margins, rewards high-volume stackers, and manages payment rails.

3. The Four Commercial Levers Controlled by Rockwell

MERCHANT POWER

A. QUANTITY VOLUME LADDERS

Institutional stackers receive automated tiered discounts on higher quantities. The discount is deducted exclusively from the markup, never compromising base metal cost.

- **1-4 units:** Full Retail Premium (+5.5%)
- **5-19 units:** 1.0% Premium Discount (\$24/coin off)
- **20+ units:** 2.0% Premium Discount (\$48/coin off)

B. PAYMENT RAIL MATRIX

Card and payment processing fees are transparently accounted for at checkout. Instant settlement methods enjoy cash-equivalent pricing without merchant fee penalties.

- **Crypto / USDC:** 0.0% Surcharge (Best Cash Price)
- **Fedwire / ACH:** +0.4% Surcharge (Direct bank wire)
- **Credit Card:** +3.9% Surcharge (Card processing fee)

C. HARD MARGIN FLOOR PROTECTION

An unyielding automated safeguard built into the engine. Even after tier discounts, coupon codes, and rail adjustments, the system will never sell below a minimum gross margin.

- **Gold Floor:** Minimum +1.5% over acquisition cost
- **Silver Floor:** Minimum +3.5% over acquisition cost

D. MARKET VOLATILITY CIRCUIT BREAKER

If spot market data spikes abnormally (e.g. >3.0% jump in under 60 seconds) or the feed drops offline, the system freezes quotes and switches to indicative safety marks.

- **Automated quote freeze** during extreme volatility
- **Zero risk** of selling at obsolete or inaccurate spot prices

4. The 120-Second Price Lock & Customer Journey

SEAMLESS EXECUTION

STEP 01

Live Storefront

Customer browses 25,000+ items. Every price reflects the exact market spot of that second.

STEP 02

120s Price Freeze

Customer clicks "Buy Now". Price freezes for 2 minutes while selecting vaulting or delivery.

STEP 03

Multi-Rail Settle

Settlement via Crypto (0%), Wire (+0.4%), or Card (+3.9%) with transparent fee display.

STEP 04

Vault Allocation

Order confirms. Metal exposure is hedged, serials allocated, and Vault Passport issued.

5. Strategic Business Impact for Rockwell

COMPETITIVE EDGE

ZERO MANUAL WORKLOAD

Whether gold moves \$10 or \$200 today, operations never touches a single product file. The entire catalog of 25,000+ items adjusts automatically in sub-milliseconds without server slowdowns.

PARITY WITH INDUSTRY GIANTS

Puts Rockwell on the exact same technological footing as APMEX and JM Bullion, giving customers institutional trust, real-time transparency, and seamless execution.
