

LIVE MARKET · PHYSICAL GOLD

The Interface Standard.

Every rule that makes Rockwell Metals look like Rockwell Metals — the obsidian foundation, the three states of gold, the mono numeral law, and the market-signal doctrine. The hard asset, documented like a digital one.

- ✓ 6 LAWS
- ✓ 17 COLOR TOKENS
- ✓ 2 TYPEFACES
- ✓ 1 EASING CURVE
- ASSAYED 2026.08.20

99.99 fine · 1 oz

XAU/USD	2,387.40 ▲ +0.42%	XAG/USD	31.08 ▼ -0.18%	XPT/USD	1,012.75 ▲ +0.21%	VAULT LIQ	\$2.41B	INV VERIFIED	12,480 oz	SPREAD	1.8%
---------	-------------------	---------	----------------	---------	-------------------	-----------	---------	--------------	-----------	--------	------

Six laws. No exceptions.

Everything else in this document is commentary. When a new screen, component, or campaign is in doubt, it is resolved against these six — in order.

LAW I

The foundation never inverts

Obsidian `#0B0B0D` is the house. Light mode is a guest, opted into by toggle and persisted as `rm-theme` — never the default, never assumed.

LAW II

Gold has exactly three states

Primary, bright for hover glints, deep for pressed states and gold-on-gold borders. There is no fourth gold. Tints are made with `color-mix()`, never new hexes.

LAW III

Signal speaks only for the market

Green is a price going up. Red is a price going down. Blue is a live feed. They are never decoration, never brand accents, never button colors.

LAW IV

Every numeral is mono

Prices, weights, serials, timestamps — anything counted is set in JetBrains Mono with `tabular-nums`, via the `.num` class. No proportional digits, ever.

\$2,387.40 ▲ +0.42%

LAW V

One hairline

`#2C2D33` is the only divider in the system. Cards, rules, table lines, the nav border — all the same 1px hairline. Depth comes from surface steps, not shadows.

1px solid var(--hairline) — the only divider needed

LAW VI

Motion glints, never dances

One easing curve — `cubic-bezier(.2,.7,.2,1)` — short durations for interaction, long slow loops for ambience. Reduced-motion collapses all of it to zero.

● §02 · COLOR — FOUNDATION

Obsidian, in four depths.

The dark stack never inverts (Law I). Elevation is expressed by stepping up the stack — obsidian to surface to elevated — with the single hairline between. Shadows exist only under floating objects: coins, dropdown panels.

SOURCE OF TRUTH
app/styles.css · :root

Obsidian
`--obsidian`
#0B0B0D
Page base. The canvas everything sits on; also the well inside meters, ranges and media plates.

Surface
`--surface`
#15161A
Cards, tiles, chips, the spot pill — the default resting elevation for any bounded object.

Elevated
`--elevated`
#1F2025
Hover states and modal/dropdown panels. A card lifts by 2px *and* brightens to this.

Hairline
`--hairline`
#2C2D33
The only divider (Law V). 1px, solid, everywhere a line is needed.

TEXT RAMP — THREE VOICES ON EVERY SURFACE

Primary — headlines, prices, answers
`--text · #F2F1EC`

Secondary — running copy, nav links, metadata that still matters
`--text-secondary · #9A9BA2`

Muted — labels, timestamps, fine print, the whisper voice
`--text-muted · #62636A`

Warm off-white, never pure **#FFF** — the ivory of a coin flan, not a screen. Muted text is for labels only; it never carries a sentence the reader must not miss.

THE ELEVATION STACK

HOVER = +STEP -2PX Y

`--obsidian`

`--surface`

`--elevated + gold-warmed hairline`

On hover a card also warms its border:
`color-mix(gold-deep 55-60%, hairline)`

● §03 · COLOR — GOLD & SIGNAL

Three golds, three signals.

Gold

--gold

#D4AF4F

The primary. Buttons, prices in gold ink, chart strokes, the brand itself. Text on it is always obsidian.

Gold Bright

--gold-bright

#F0D38A

Hover glints and highlights — the flash of light off the coin. Never a resting color.

Gold Deep

--gold-deep

#8A6B2C

Pressed states and gold-on-gold borders. The shadow side of the metal.

SIGNAL — MARKET DATA ONLY (LAW III)

TOKEN	HEX	SPEAKS FOR	NEVER FOR
▲ +0.42%	#34C77B	Price up, filled orders, in stock	Success toasts, brand accents
▼ -0.18%	#F0524D	Price down	Errors, destructive buttons
● LIVE	#4DA8FF	Live feeds, auctions, pre-sale	Links, info banners

Direction is never color alone — every move carries its glyph:
▲ U+25B2 up · ▼ U+25BC down, at .72-.74em, for color-blind readers.
Availability tags (*In stock*, *Sale*) drop the glyph — they are not price moves.

GOLD TINTS — MIXED, NEVER MINTED

9%

12%

16%

22%

All translucent golds are `color-mix(in srgb, var(--gold) N%, transparent)` —
9% tile halos · 12% media plates · 16% selected ranges · 22% the coin halo (`-halo`).

MISUSE — RULED ON

Gold for a price that just ticked up

×

FORBIDDEN

Gain-green on the word “Verified”

×

FORBIDDEN

Live-blue pulse dot on an eyebrow label

✓

PERMITTED

Gold ink for prices at rest

✓

PERMITTED

A fourth gold “just for the campaign”

×

FORBIDDEN

● §04 · LIGHT THEME

Bone, by request only.

Light mode is a warm bone canvas, not an inversion. Token *names* stay constant; values flip under [data-theme="light"]. The choice persists in localStorage["rm-theme"] and is applied pre-paint so the page never flashes.

LIGHT SPECIMEN — TOKENS FLIPPED, NAMES CONSTANT

Gold, live.

Cards go to pure white on the bone canvas; the hairline warms to #E4E0D6; and gold used as ink deepens so numerals stay legible.

SIGNAL DEEPENS · GOLD-INK #7A5E27 · SHADOWS GO GOLD-DUST · THIS DOCUMENT IS SET IN IT

CARD ON BONE

American Gold Eagle

\$2,512.10

THE FLIP TABLE

TOKEN	DARK	LIGHT
--obsidian	#0B0B0D	#F5F3ED — warm bone
--surface	#15161A	#FFFFFF
--elevated	#1F2025	#EFEDE5
--hairline	#2C2D33	#E4E0D6
--gold-ink	#D4AF4F (=gold)	#7A5E27 — deep, legible
--gain / --loss / --live	#34C77B / #F0524D / #4DA8FF	#1B9E57 / #D63B36 / #2563EB

WHAT NEVER FLIPS

- gold, --gold-bright, --gold-deep — the metal is the metal. Only --gold-ink, gold used as text, deepens.
- Component geometry — radii, spacing, hairline weight are theme-blind.
- The logo halo drops — the wordmark’s drop-shadow lift exists only on obsidian; light mode sets filter: none.
- Shadows warm up — --shadow goes from 70% black to 24% #6B5A2E: gold dust, not soot.

Two faces, one law.

WEIGHTS LOADED

SANS 400 / 500 / 600 / 700 · MONO 400-700

SCALE — CLAMPED, NOT STEPPED

HERO · 600
`clamp(40px, 6.4vw, 76px) ·`
`-0.03em`

The hard asset,

SPACE GROTESK

VOICE

Aa Gg Rr & 0123

Everything that speaks. Headlines tighten -0.02 to -0.03em; eyebrows open +0.18em in caps. Weight 600 is the workhorse; 700 is reserved for spot prices.

JETBRAINS MONO

LEDGER

\$2,387.40

1,062,411 · SN 004-88123-C · 4s ago

Everything that counts (Law IV). Applied by the `.num` class: `tabular-nums`, -0.01em. Also carries ranges, tape items, serials, timestamps and spec labels.

SETTING RULES

- Body max-measure ≈ **46-56ch** (hero sub 46, section sub 56).
- Headings never exceed weight 600 — the metal shines, the type doesn't shout.
- Caps exist only at 11px and below, always letter-spaced ≥ 0.1em.
- No italics except the tape's neutralized `<i>` glyph carriers.

● §06 · GEOMETRY

Coin-round, card-square.

Two radii and a pill. Anything interactive and small is fully round like the coin; anything that contains is 12px; anything nested inside a container steps down to 8px.

--RADIUS · 12PX

Cards, tiles, panels, dropdown panels, gallery stages.

--RADIUS-SM · 8PX

Nested objects: thumbs, timers, passports, pager buttons, focus rings.

--RADIUS-PILL · 999PX

Buttons, chips, tags, pills, spot, meters — everything you touch or read at a glance.

PAGE RHYTHM

MEASURE	VALUE	NOTE
Content wrap	--wrap · 1200px	Centered, 20px side padding
Grid gap	--gap · 20px	One gap for every grid — drops, tiles, bento, trust
Section padding	clamp(40px, 6vw, 74px)	Vertical only; sections never get background changes without a hairline
Nav height	64px + 38px tickbar	Sticky, 82% obsidian, blur(14px)
Tape bar	38px fixed bottom	Body reserves it: padding-bottom 38px
Card padding	20px · bodies 16–18px	Media plates 22–28px

CATALOG GRID — 4 / 3 / 2 / 2

≥ 981px — 4 columns

34px squares, radius-sm. Current page = gold 18% fill + gold ink. Disabled sits at 45% opacity, inert.

FILTER CHIPS & RANGE SWITCH

All

Coins

Bars

Collectibles

1D

1W

1M

1Y

ALL

Selected chip fills solid gold with obsidian text. The range switch is the inverse register — a recessed obsidian well, the live range tinted gold 16% with gold ink, set in mono because ranges are data.

METERS — SCARCITY & SENTIMENT

SCARCITY · 9 LEFTGOLD FILL

SCARCITY · LOW STOCKGOLD-DEEP FILL

SENTIMENT · BULLISH 72DEEP-GOLD GRADIENT

6px tall, pill-shaped, recessed in an obsidian well. Fills animate width over 800ms. Meters are always gold — they measure the metal, not the market.

● §08 · COMPONENTS — CARDS & TAGS

The drop card, dissected.

02:41:09

CATALOG VARIANT — PHOTO PLATE

REAL PHOTOGRAPHY SITS ON A #FFF PLATE WITH **mix-blend: multiply**. NAMES CLAMP AT TWO LINES SO TILE ROWS STAY ALIGNED.

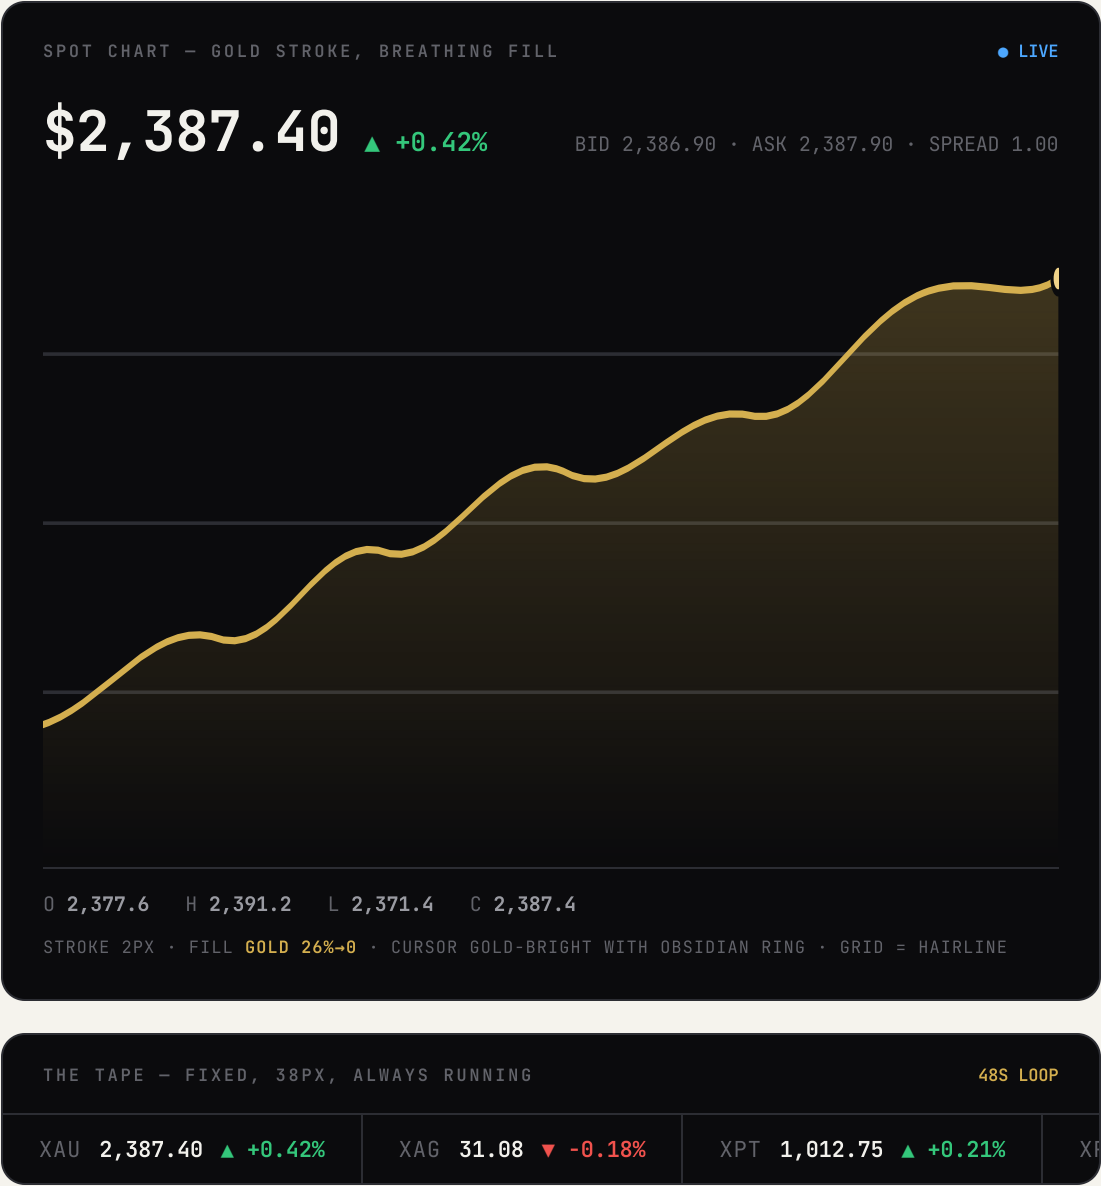

ANATOMY — RULED

- **Media plate:** obsidian well + radial gold 12% halo behind the object; hairline below.
- **Price:** mono 600 in gold ink; premium in secondary with the figure emphasized.
- **Hover:** -2px Y, elevate fill, gold-warmed border, 200ms.
- **Object shadow:** drop-shadow only — the coin floats, the card doesn't.
- **Scarcity tag:** top-right, translucent surface + blur(6px), always mono-counted.
- **Photography:** real product shots sit on #FFF plates with mix-blend: multiply — never on obsidian.

THE TAG REGISTER — ONE SHAPE, MANY DUTIES

In stock	Sale	Top pick	Pre-sale	Coming soon	▲ +0.42%	▼ -0.18%
● Live auction	✓ Insured	● Bidding open	Assay-backed			
CLASS	RECIPE	RULE				
.tag--*	color-mix(hue 13-22%, transparent) + hue ink	Availability tags never carry ▲▼ — they aren't price moves				
.pill	obsidian fill + hairline + ✓ in gold	Verifications and provenance facts only				
.badge	gold-deep border + gold ink, transparent fill	The highest honor — assay, custody, insurance claims				

The terminal layer.

BENTO — THE DASHBOARD MAP

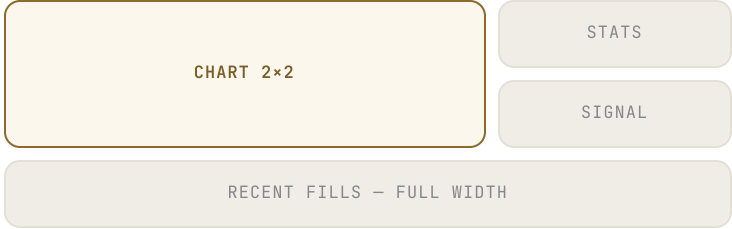

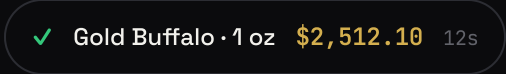

Chart owns the left 2×2. Stats and Signal stack the third column. The fill tape runs the full width. Collapses 2-col at 980, single at 620.

A FILL — ONE EXECUTED ORDER

Slides in from the left, 450ms. Check in gain-green (an executed order is market data), price in gold ink, age in muted mono.

TICK BEHAVIOR

- A number that moves flashes .tick-up / .tick-down for 250ms, then returns to rest color.
- Timestamps count relative — 4s ago — and resync visibly.
- Live regions announce politely: aria-live="polite" on the feed.
- Every simulated figure stays plausible — the demo lies, but never badly.

● §10 · MOTION

One curve, two tempos.

Interactions are quick glints; ambience is a slow, heavy drift — a coin floating, a tape crawling. Both ride the same curve.

DURATION LADDER

MS	USED FOR
150–180	Hover color/border shifts, link warms, button presses
200–250	Card lift + elevate, tile reveals, tick flashes
350	Theme crossfade (background + text)
450	A fill sliding onto the tape
800–1000	Meter fills, chart stroke draw-in

AMBIENT LOOPS — THE SLOW LAYER

KEYFRAME	PERIOD	WHAT IT IS
pulse	1.8–2.4s	Live dots breathe a 7px blue ring outward
float	7s	The hero coin drifts ±12px — weightless bullion
marquee	26s	Footer ticker crawl, linear
tape	48s	Bottom tape crawl, linear — slower, heavier
cursorGlow	700ms	Chart cursor swells 3.5→6→3.5 on data arrival

REDUCED-MOTION CLAUSE. Under prefers-reduced-motion every animation and transition collapses to 0.001ms, loops run once, the coin lands, the tapes stop, the chart draws instantly. Non-negotiable.

Assayed, not advertised.

THE REGISTER – SPECIMEN LINES, VERBATIM

“The hard asset, traded like a digital one.”

THE THESIS – PARADOX STATED FLATLY, NO EXCLAMATION

“Gold, live.”

SECTION TITLES ARE TWO OR THREE WORDS, PERIOD INCLUDED

“Vault inflows are up week over week. Sell-back spreads are tightening as live inventory depth improves.”

DATA COMMENTARY – DECLARATIVE, PRESENT TENSE, ZERO ADJECTIVES OF ENTHUSIASM

“Limited verified inventory, released in timed market drops.”

SCARCITY IS A FACT WITH A COUNTER, NEVER A COUNTDOWN OF PANIC

RULINGS

- Verbs of verification: **assayed, vaulted, verified, filled, synced.**

— Numbers carry the excitement; sentences stay level.
- Banned: *luxurious, exclusive, don’t miss out, hurry,* and every exclamation mark.

— Section indexes (01 / Live Spot) count real page order — never decoration.

§12 · COLOPHON

Document	RM-STD/001 · Rev 2026.08 · 12 sheets
Source of truth	app/styles.css (+ market / product / vault.css)
Typefaces	Space Grotesk · JetBrains Mono
Tokens	17 color · 3 radii · 1 ease · 2 faces
Set on	Bone #F5F3ED – specimen plates stay obsidian

CERTIFIED CONSISTENT WITH THE SHIPPING PRODUCT AS OF **2026.08.20.**
AMENDMENTS REQUIRE A NEW REVISION NUMBER – NEVER A QUIET EDIT.
